

# Running Maintenance Schedule for the Fuel System

The table displays the GE-recommended running maintenance schedule for the fuel system and its major components.

Item	Recommendation
Daily or Trip	
Fuel System	While the engine is idle, make a visual inspection of the fuel tank, engine, fuel transfer pump, fuel manifold, fuel filter tanks, regulating valve, high-pressure equipment (HP pumps, HP fuel lines, and injectors), and all system piping for fuel leaks. Make corrections as necessary.
Every 184 Days	
Fuel Filters	Replace the fuel filter elements.
